https://147408807.hs-sites-eu1.com/my_protfolio

Summary

Passionate Flutter Developer and Computer Science student at the Faculty of Computers and Artificial Intelligence (FCAI). Experienced in building cross-platform mobile applications using Flutter and Firebase with clean architecture principles. Completed professional training through ITI and Sprints, and currently advancing technical and professional skills through the Digital Egypt Pioneers initiative by MCIT. Strong problem-solving abilities with a focus on delivering scalable and user-friendly applications.

Technical Skills

Mobile Development:

Flutter, Dart, Responsive UI, REST API Integration

Architecture & State Management:

BLoC Pattern, Clean Code,

Backend & Services:

Firebase Authentication, Firebase Storage

Programming Languages:

Dart, Python, JavaScript

Tools & Platforms:

Git & GitHub, VS Code

Other Knowledge:

Data Structures, OOP

Education

Faculty of Computers and Artificial Intelligence (FCAI)

Bachelor's Degree in Computer Science

Expected Graduation: 2026

Trining & Certifications

ITI Summer Training – Flutter Development

- Built real-world mobile apps using Flutter
- Worked with Firebase
- Applied clean architecture and best practices

Sprints – Mobile App Development Certificate

- Intensive training on Flutter fundamentals and advanced UI
- Implemented production-level mobile application features

Digital Egypt Pioneers Initiative (DEPI) – MCIT

- Ongoing technical and professional development program
- Enhancing software engineering and freelancing skills

Projects

Coffee E-Commerce Mobile App

A cross-platform mobile application for selling bakery products and beverages, designed to provide a smooth and user-friendly shopping experience. The app allows users to browse products, view detailed descriptions, add items to their cart, and place orders

Technologies Used: Flutter, Firebase, State Management

News App – API-Based Mobile Application

A cross-platform mobile news application built with Flutter that delivers real-time news from external APIs. The app provides users with an easy and engaging way to stay updated with the latest headlines across multiple categories.

Technologies Used: Flutter, REST APIs, JSON Parsing, State Management
